Ridgeway

Gamma

- You can find your heater valve at the bottom of your radiator
- Twist right to increase heat, and left to decrease
- The snowflake symbolizes frost protection
- The green tab is a reference mark for which level you are on

Beta

- You can find your heater valve at the bottom of your radiator
- Follow the Arrow that says “open”
- Twist right to increase heat and left to decrease

Beta

- You can find your Thermostat located on the wall
- Push the arrow pointing up to increase heat, and push the down arrow to decrease
- Remove the front cover to access hold temperature, clock, and presets

Note: When you’re away from your room for an extended period of time in the winter, please close all windows and keep your heater on. Place it on the lowest setting or on frost protection.
Ridgeway
